THE INSTITUTE OF BEHAVIORAL ANALYSIS AND MANAGEMENT

...winning with people.

Evidence-based to optimize performance

Overview

Human behavior is essential not only to organizational success but also to the prosperity of society as a whole. When the actions of an organization's constituents align with its visions and mission, significant achievements are inevitable. Similarly, there are behaviors that impede the success of an organization. Consequently, managers and executives with behavioral analysis skills have intellectual ability to achieve results more quickly than those without these skills do.

Corporate governance requires behavioral analysis because it enables organizations to gain insight into the motivations, attitudes, and decision-making processes of individuals within the organization. By analyzing employee behavior, organizations can identify patterns that may signal potential hazards, such as fraud, malfeasance, or regulatory noncompliance.

Furthermore, behavioral analysis assists organizations in identifying areas where enhancements can be made to increase productivity and decrease the likelihood of errors or accidents. By analyzing the behavior of employees in high-risk environments, organizations can identify potential hazards and implement countermeasures.

What is behavioral analysis?

Behavioral Analysis is the study of human behavior patterns and their underlying causes. It emphasizes understanding the conduct of individuals and groups in a variety of settings, including the workplace, the classroom, and social situations. Behavioral analysis seeks to identify the causes and effects of human behavior in order to make predictions, solve problems, and improve outcomes.

In the context of business and corporate governance, behavioral analysis involves evaluating the behavior of employees and other organizational stakeholders using data and insights from psychology, sociology, and other related fields. This can aid executives in identifying behavior patterns that are affecting the establishment's performance and in developing solutions. By analyzing employee behavior, for example, businesses can identify areas where additional training or incentives may be necessary to increase productivity or morale.

In addition, behavioral analysis can be used to identify organizational hazards and vulnerabilities, such as the possibility of fraud or security issues. By analyzing behavior patterns, businesses can develop systems and procedures to mitigate risks and protect their interests.

Behavioral analysis is a valuable tool for enhancing corporate governance and promoting business success. By understanding the behavior of individuals and groups within an organization, leaders can make better decisions, manage risk more effectively, and cultivate a culture of success that is beneficial to all parties.

About Us

The Institute of Behavioral Analysis and Management (IBAM) is a leading self-sustaining, professional association, and educational institution, focused on the study and practice of behavioral analysis and management. The Institute is dedicated to promoting the principles and techniques of behavioral analysis as veritable tools for effective management, and efficient organizational leadership.

The Institute offers a range of services to its members, including professional development opportunities, continuing education courses, research and publication support, networking and collaboration opportunities. Members of The Institute include behavioral analysts, psychologists, educators, healthcare professionals, and business leaders from around the world.

Our Vision

Our vision is to provide our members with cutting-edge research, training, and consulting services that enable them to improve outcomes, make a meaningful difference in their careers, and receive recognition for their excellence, integrity, and innovation through the application of behavioral analysis principles.

Our Mission

The Institute's mission is to advance the science and practice of behavioral analysis and management, and to promote its application in improving the lives of individuals and communities

Membership benefits and privileges
